GCC LaserPro X500III Pro

Embrace the cutting technology from the GCC LaserPro X500III designed and engineered for professional use. Moreover, GCC releases X500III Pro version for advanced cutting quality and uniformity of line width by adding one beam expander and red beam combiner.

Packed with several user-friendly features, the GCC LaserPro X500III Pro offers high product performance in terms of both durability and feasibility. The X500III Pro model combines cutting and engraving capabilities to give users a versatile system.

Beam Expander

X500III Pro includes one 1.6X beam expander for uniformity of line width that presents outstanding quality and reliability.

Closed-loop DC Servo Technology

The X500III Pro utilizes high performance closed-loop DC servo motors for precise and fast carriage movement combined with a reliable motion system to produce exceptionally accurate outputs.

New Design of X500III Pro Carriage

Advanced X500III Pro carriage design to increase the stability of the carriage movement, elevate the performance of X500III Pro.

Key Switch & Emergency Stop

Key switch safeguards the machine from unauthorized use. Prominent emergency button located on the top of the machine allows operators to stop the laser and the motion carriage immediately to provide a safe operating environment.

Knife-shaped Cutting Table

Unique cutting table with tipped bars that can be easily adjusted without tools to create different levels of working depths. The cutting table of X500III Pro reduces laser reflections and delivers clear cutting edge.

Drag-N-Play

The "Drag-N-Play" feature greatly reduces complex set up procedures and allows users to directly drag the lens carriage to the starting point of a job.

Intuitive Control Panel Interface

A control panel with coherent hot-key design and graphic icon displays that allows you to directly change the laser parameter setting, set jobs to repeat unlimited times, queue job, delete jobs, and more.

Versatile Cutting & Engraving Capability

X500III Pro delivers high cutting quality with LaserPro's unique laser firing control technology. X500III Pro can cut through 20 mm acrylic in a single pass. Better than that, the grayscale technology allows X500III Pro to process 256-level grayscale image with vivid engraving quality.
